

System of four independent hydraulic shakers with adjustable distances to accommodate the size of the EUT.

The 4Poster is complemented by the TWINS system that is conceived for similar testing on the horizontal axes.

Targeted at the automotive, railway, naval and transportation sectors (pictured).

Force sine / random	kN	160 (peak)
Max displacement (pk-pk)	mm	150
Max frequency	Hz	200
Max payload	kg	4000
