

CENTROTECNICA

stress to ensure

SHOCK MACHINE AVCO 220

upgraded version developed by Centrotecnica

FEATURES AND PERFORMANCE

Maximum acceleration: 1500 g
Maximum speed: 8,38 m/s
Maximum stroke: 500 mm
Shock endurance: 0.3 - 14 ms
Setup area: 600 x 600 mm
Maximum payload: 180 kg

This machine allows the execution of mechanical semi-sinusoidal shock tests.

AVCO105 is used for item during engineering and design phases for resistance or destructive tests on components, circuits and complete systems.

Thanks to Centrotecnica's upgrade it has a new digital control and a new pneumatic circuit that makes the machine able to strongly increase the number of shocks per minute and to obtain a very precise reproducibility.
