*stress to ensure*

## CENTRIFUGE SYSTEM BY CENTROTECNICA

*Centrifuge system is a special project realized by Centrotecnica to perform static acceleration tests.*

*Thanks to the modularity concept and to the precision of measurements, the machine is suitable for tests on a wide variety of items.*

*During the rotation it is possible to power or monitor the item under test, by mean of a slip ring.*

*Thanks to the electronic control the required acceleration can be reached with a controlled gradient.*

### FEATURES AND PERFORMANCE

Maximum static acceleration: 20 g

Maximum continuous rotation speed: 150 rpm

Peak rotation speed: 250 rpm

Maximum usable diameter: 6 mt

Maximum payload: 70 kg
