stress to ensure

CENTROTECNICA INCLINED IMPACT 01

Inclined plane machine used to test the shipping units' capability to withstand horizontal impact forces.

Test performed during transportation test cycles, to evaluate shipping container's ability to protect a product from failure due to horizontal impacts. Shocks are reproduced on the four lateral faces of packages.

The features of the Inclined Impact 01 comply with ASTM and ISTA specifications.

FEATURES AND PERFORMANCE

Maximum payload: 1.500 kg

Maximum impact speed: 2.65 m/s

Support plane size: 1.600 x 1.600 mm

Impact plane size (w x h): 1.600 x 2.530 mm
