DROP MACHINE CENTROTECNICA

Drop testing determines the ability of a package to withstand the accidental impacts prevalent in the distribution environment.

Drops can be reproduced on faces, edges or corners..

The characteristic that makes our own made machine is the innovative position of the folaway forks that allows drops starting from 1 centimeter height.

FEATURES AND PERFORMANCE

Maximum payload: 70 kg

Maximum item size: 900 x 980 mm

Minimum drop height: 10 mm

Maximum drop height: 1500 mm
