HYDRAULIC SHAKER LANSMONT LS 15000-40

Hydraulic shaker for low frequency vibration tests on vertical axis.

System suitable for tests on many items or packages at the same time, or on large and/or heavy items.

Ideal for transportation tests according to ASTM and ISTA.

FEATURES AND PERFORMANCE

Force sine (peak): 66 kN

Maximum displacement: 254 mm (pk-pk)

Usable frequency range: 1 - 300 Hz

Armature size: 1200 x 1200 mm + expander

Maximum payload: 1500 kg

Number of controller channels: up to 32

Tests: Sine, Random, Shock, Dwell, Loose Load...
